Installation Guide

Hexguard
British made plastic brickguard

Strap Installation Guide:

Step A - Insert prongs into aperture and "click" secure. The strap will "stay in place" for future jobs! – No need to remove!

**Step B** - Wrap strap around tube, locate 'T' aperture over lug and secure.

To Release:

Step C - Pull down on "T bar" to release.

Safety Notes:

✓ We recommend that Hexguard is attached using three straps or cable ties on the top rail and two cable ties on the middle rail, as shown opposite.

✓ Always release straps or ties before removing the Hexguard panel.

✓ We recommend stacking Hexguard in bundles of 25 panels. Hexguard should only be strapped using synthetic cord strap. Do not use steel banding.

✓ Never drop Hexguard off scaffolding as this may harm people below

Our unique installation system ensures that securing HexGuard© is as simple as A, B, C!
