

Scaffold Safety Light (Side Mount)

This new, innovative product from Scaffolding Direct is the very best design for illuminating your scaffolding or skips.

Simply clamp it on to the scaffolding with the security screws provided and it will typically last 4 months flashing/2 months static from 2 x AA batteries (not included).

This right angled lamp can also be fixed to almost any object with a clampable surface such as skips, barriers, construction equipment or walls.

This site safety light is also available in white or red colours or a metal alternative.

- 360 Degree lens for all-round visibility
- LED technology for superior reliability and battery life
- Built in light sensor - only illuminates when dark.
- Can flash (one press) or illuminate continuously (two presses)
- Built to last - Totally weatherproof design
- Battery life: Typically 4 months flashing / 2 months static from 2 x AA batteries (not included)
- Comes with security anti-theft fixings
- Can be locked to scaffolding with a padlock for additional security
- Designed and developed in the UK
- Can be mounted or screwed to almost anything!
- Typical Applications for Each Colour Light

Red - Usually used on scaffolding sites to mark road side construction.

White - Usually used on scaffolding sites to mark pedestrian walkways.

Amber - Usually used on barriers or other equipment that needs to be marked.
