

### TS62 Debris Netting (FR)

Debris netting is durable, heavy duty plastic netting for use on scaffolding to protect pedestrians and traffic from falling debris. Additionally, this construction net allows air circulation and considerably reduces rain and wind penetration which improves the working environment for construction personnel.

We supply POWERCLAD netting, which is the only TS62 netting in the UK market with a stitched in certificate number. This means when the netting is on a job, you have full traceability for the roll. TS62 Debris Netting is required for many scaffolding contracts within the UK and abroad.

**Specification** – 55gsm

**Length** – 50m

**Width** – 2m or 3m

**Colour** – Green, blue, white, black or red

**Fire Retardant** – Yes (TS62)
